

# RAMIRENT Towards carbon free worksite

## Main Themes

### Use less energy and only renewable

We reduce our electricity and heating consumption in all our premises and fuel consumption of our internal vehicles. The one we still use after the reductions to be only renewable energy.

### Support customers' green journey toward carbon free worksite

We provide a full rental behavior insight for our customers to help customers make green choices

## 2025

### Energy savings in all Ramirent premises -10%

- Improve the energy performance of our buildings.
- Lower and optimize temperature in all buildings based on usage and time
- Transition to LEDs, time-delaying systems and detectors
- Train all employees in energy saving

### Transition renewable energy sources

- Transition from carbon to renewable energy sources
- Aim to use only renewable electricity in all buildings
- Investments in solar panels and heat pumps

### Internal vehicles: Fuel consumption reduction -10 % and renewal with low-emission vehicles

- Replace our current internal vehicles with low-emission ones by having a car policy that favors electric and hybrid vehicles
- Train employees in eco-driving
- 100% renewable fuels: All non-electric vehicles use only renewable fuels.

### Increase the number of electric and hybrid equipment in our fleet

- Invest in low and zero emitting equipment (RamiGreen), where also noise pollution is minimal
- Expand our range of RamiGreen equipment in all product groups, especially alternatives to traditional diesel equipment

### Logistics optimization and transition to less emitting logistics

- Digitalization of delivery rounds to optimize them and reduce the number of kilometers travelled as well as the proportion of empty runs
- Internal and external logistics solutions rely on gas trucks and other modern technology fleet (EURO 5 & EURO 6)
- Have renewable fuels as an option for customers, and transition to 100% renewable fuels while approaching 2030

### Fully automatic CO2 calculator for the whole value chain

- Support customer to make green choices based on the rental behavior

## 2030

### Electricity contracts are green 100%

- All Ramirent premises use only renewable electricity

### Increased number of green services

- New green services to raise customers' awareness of green choices and support them toward low or carbon free worksites

## Target 2030 Carbon footprint reduction

**-50%**  
Direct emissions  
( Scope 1 & 2 )

**-30%**  
Indirect emissions  
( Scope 3 )

Science Based Targets Initiative (SBTi) has validated Ramirent's climate targets in 2023. An independent body evaluates Ramirent's emission reporting quality and progress against targets annually. Target setting and action trajectory cover scopes 1, 2 & 3.
